udemy 2018 - present
Next-JS Course, React Course, Javascript Course, Basic Web Design Course

Adamson University 2009 - 2014
Bachelor of Science In Civil Engineering
Graduated as academic merit awardee.

LANGUAGES

English

Filipino

PROFILE

I am self taught web developer currently based in Singapore looking for opportunities in the tech sector. Currently working as a design engineer in a manufacturing company. Looking forward to utilize my experiences and lessons in structural engineering and in life to my career as a web/software developer.

Interest in programming started when I was exposed to Visual Basic Programming at work as a structural engineer around 5 years ago. From then I studied on my free time and now looking to transition fulltime.

RELEVANT EXPERIENCE

Developer at www.quarto.asia   2023-present

- www.quarto.sg is a "Room for rent app" focused on listing of room rentals which is perfect in Singapore where there is a huge rental market.
- I developed quarto.asia as a capstone project to show case my skills as a developer and also to exposed my self to other web technologies
- quarto.asia is developed using Next-JS as my frontend framework, and mongodb via prisma for my database.
- Styling was managed using tailwindcss and shacdn-ui library to create accesible components
- Authentication was done through next-auth enabling login via email and google.
- Image upload was possible using cloudinary as storage.
- Address suggestions while posting was done through one map api.
- Maps and markers by using react-leaflet.
- Domain is bought using godaddy and hosted in vercel.

CAPSTONE PROJECTS

notion-clone   *www.jl-next-notion-clone.vercel.app*
Notion clone built with next-js, typescript and tailwind-css. Realtime interactivity done using convex, shadcn-ui for frontend and clerk for auth.

messenger-clone   *www.jl-next-messenger-clone.vercel.app*
A Messenger clone using next-js, typescript and tailwind-css. Realtime updates via pusher and database using mongodb with prisma as ORM.

netflix-clone   *www.jl-next-netflix-clone.vercel.app*
A Netflix clone created using next-js, prisma, tailwind and mongodb.

airbnb-clone   *www.jl-next-airbnb-clone.vercel.app*
A airbnb clone created using next-js, prisma, tailwind and mongodb with full CRUD capabilities.

twitter-clone   *www.jl-next-twitter-clone.vercel.app*
A twitter clone created using next-js, prisma, tailwind and mongodb.
